

Uber

Uber Technologies Inc. is a leading global technology company that provides ride-hailing, food delivery, and freight transportation services through its digital platform. Operating in more than 70 countries, Uber connects millions of riders with drivers using real-time GPS technology and secure digital payments. The company focuses on making transportation faster, safer, and more accessible while continuously improving the user experience. This dashboard analyzes Uber trip data to uncover key insights into bookings, revenue, trip trends, peak demand periods, and customer travel patterns, helping support data-driven business decisions.
